Schüssler-Salts
Vital Energy for every Cell

Dr Wilhelm Heinrich Schüssler (1821-1898) discovered and defined twelve endogenous mineral salts which he combined to a successful healing method – Biochemistry according to Dr Schüssler.
His doctrine: The intake of these mineral salts in the finest potentised dosage gives the cells the decisive impulse to optimise mineral utilisation and strengthen the organism.
This traditional healing method is still valid today: Because Schüssler-Salts afford an individual therapy, so everyone is able to follow their personal path of health. All Schüssler-Salts are specifically attuned to various needs and at the same time provide a holistic therapeutic approach. They assist the body in the supply with minerals and can also be used in acute afflictions.

Based on decades-long experience Pflüger GmbH produces biochemic remedies in their original potencies according to Dr Schüssler, in accordance with the regulations of the Homoeopathic Pharmacopoeia.

"Each biochemic remedy has to be diluted in such a manner that the functions of healthy cells are not disturbed, and existing functional disorders can be balanced."
Dr Wilhelm Heinrich Schüssler
