

RHINO-PFLÜGER® NASAL SPRAY

INSTRUCTION MANUAL

Dear Users,
Please read the following instructions carefully, as they contain important information on what you should consider in using this product. For any questions, please contact your practitioner.

RHINO-PFLÜGER® NASAL SPRAY

Isotonic Sodium Chloride Solution with Additional Minerals.

Fields of Application

For the supportive treatment of blocked nose, cleansing and humidification of the nasal mucosa.

Children over 2 years of age and adults:

- As required 1 to 2 puffs into each nostril several times a day

Contraindications, Interactions, and Side Effects

When using RHINO-PFLÜGER® NASAL SPRAY as intended there are no known contraindications, interactions, or side effects.

Reference

RHINO-PFLÜGER® NASAL SPRAY is equipped with a particular spray system. This allows for the products to be produced without preservatives.

RHINO-PFLÜGER® NASAL SPRAY is therefore particularly suitable for adults, children, and babies in case of irritable and sensitive nasal mucosa, and also for long-term administration.

What to consider during Pregnancy and Nursing Period?

RHINO-PFLÜGER® NASAL SPRAY can be used, both during pregnancy and nursing period.

Dosage instruction, Manner, and Duration of Administration

The following dosage instruction is only a guideline the amount and frequency of application can be altered according to individual aspects.

How often and what amount should RHINO-PFLÜGER® NASAL SPRAY be applied?

Babies and infants under 2 years of age:

- As required 1 puff into each nostril several times a day

How should RHINO-PFLÜGER® NASAL SPRAY be administered?

Remove protection cap. Prior to first use until leakage of a smooth spray mist activate the spray trigger several times. The spray is now always ready for further use. Insert the spray head into the nostril and puff once. During this process slightly inhale through the nose. Keep the bottle vertical. Do not spray horizontally or downwards. For hygienic reasons wipe the spray head after each use and replace the cap.

How long can RHINO-PFLÜGER® NASAL SPRAY be use?

The duration of application is unlimited. When no improvement is registered after 14 days consult your practitioner.

Dalby QLD 4450
Australia

Further information to RHINO-PFLÜGER® NASAL SPRAY:

Minerals have long been used in medicine for the relief of illnesses. Spa towns uses so-called graduation works where salt-laden brine from natural springs is passed via a scaffolding of brushwood walls and finely sprayed.

This helps the recovery of the nasal mucosa and often brings immediate relief to people particularly suffering from respiratory problems.

In a similar way, the minerals contained in RHINO-PFLÜGER® NASAL SPRAY are able to purposefully affect the nose. The effect of the physiological sodium chloride solution in RHINO-PFLÜGER® NASAL SPRAY is ideally supplemented with further minerals. RHINO-PFLÜGER® NASAL SPRAY is well tolerated and thus can be used over a longer period of time.

In rhinitis the nasal mucosa is particularly affected. The result is a runny and blocked nose.

RHINO-PFLÜGER® NASAL SPRAY assists a quicker regeneration of the mucous membrane and facilitates the cleaning of the nose naturally.

This noticeably reduces the irritant effect on the nasal mucosa.

RHINO-PFLÜGER® NASAL SPRAY can be used in supplementation of traditional rhinitis remedies, but it can also – particularly in babies and infants – be used a sole remedy in the mild treatment of rhinitis.

Rhinitis is not the only cause for the nasal mucosa to suffer. For instance, dry air in overheated rooms and air conditioning, smoke, and other annoying environmental influences can trouble the mucous membranes of the respiratory system, in particular the nasal mucosa.
